

JADON YLINEN

About

Fast-learning and technically skilled AV professional with three years of hands-on experience. I specialize in videography and camera operation but am also familiar with DMX lighting systems and live production concepts. Proficient in setting up, operating, and troubleshooting camera systems to capture high-quality video in a variety of environments.

I am good at quickly adapting to new environments, equipment, and workflows I have a strong eye for detail and visual composition. I also work well under pressure in fast-paced settings while keeping high standard of production quality.

I will bring a dependable work ethic, strong problem-solving skills, and a passion for creating clean, professional visual content. I'm excited to continue growing within the AV and video production industry.
